HANNIBAL

ROME vs CARTHAGE

The Second Punic (or Hannibalic) War (218-201) was the inevitable return match between Rome and Carthage (the former colony of Phoenician Tyre) for control of the western Mediterranean. The completion of the conquest of Italy south of the Po valley had brought the Roman Republic face to face with Carthaginian power in Sicily, and security concerns almost immediately led to war over the island. Although possessing no navy and taking on the premier naval power in the Mediterranean, the Romans nevertheless managed to defeat Carthage in the

First Punic War (264-241) and take possession of Sicily, their first extra-Italian acquisition. Carthage remained, however, a major power, controlling western North Africa, the coast of Spain and the remaining islands in the west.

In 237 Hamilcar Barca, leader of the most important family in the Carthaginian Republic, began expanding the Carthaginian presence in Spain, using Spanish silver to finance the establishment of an army there. By recruiting among the Iberian tribes Hamilcar was following a traditional policy of hiring mercenaries to fight Carthage's wars on land, but so great became the loyalty of these troops to the Barca family, which controlled the Carthaginian government, that they could be considered virtually a national army. Hamilcar, who drowned in 229, was succeeded by his son-in-law Hasdrubal, who was himself assassinated in 221, and command in Spain passed to Hamilcar's 26 year old son, Hannibal.

Hannibal, who at the age of 9 had supposedly been made by his father to swear revenge against Rome, certainly suspected that a final showdown was inevitable, and Rome's diplomatic meddling in Spanish affairs convinced him of it. Knowing the Romans were preparing for war, in late summer 218 he crossed the Pyrenees with some 50,000 foot, 9000 horse and perhaps 37 elephants. Because of Roman sea power, Hannibal had little choice but to walk to Italy, and because a Roman army blocked the coastal route, he was compelled to move up the Rhone and cross the Alps from the north. Despite help from his Gallic allies, battles and the rigors of the march itself left him with some 20,000 foot, 6000 horse and possibly a few elephants by the time he descended into the Po valley near the end of 218. There, however, he was immediately joined by tens of thousands of Gauls who had settled in the region (subsequently named Cisalpine Gaul) two centuries earlier. This Gallic sword-fodder allowed Hannibal to preserve his precious and better-trained Iberians and Africans.

Hannibal was met by the two consuls for 218, P. Cornelius Scipio and T. Sempronius Longus, who had moved north with an army of 16,000 Roman and 20,000 Italian allied foot and 4000 horse. The armies met south of Placentia at the river Trebia, where Hannibal had laid a trap. Scipio and Longus walked right into the ambush, and only 10,000 Romans escaped the battle, nevertheless impressing Hannibal with their

ability to punch through the more lightly armed Gauls who had formed his center.

In 217 Rome fielded 11 legions and their attendant allied troops, a force of about 100,000 men scattered about Spain, Corsica, Sicily and Italy. Except for some cities the northern plain was abandoned, and Hannibal followed the Romans south, crossing the Apennine mountains in spring of 217. On the shore of Lake Trasimene in north central Italy he saw the opportunity for another ambush, and in the resulting battle of Trasimene the Roman consul C. Flaminius was killed, and virtually all of his army of two legions and allies, some 25,000 troops, were killed or captured. An official reporting on the disaster to the Senate said simply: "We have been beaten in a great battle." No kidding.

In the wake of this disaster Q. Fabius Maximus was appointed to the emergency office of Dictator and began pursuing "Fabian" tactics, harassing Hannibal and especially his foraging parties, but refusing serious battle. While this was, at least temporarily, the correct strategy, it was also very unpopular in Rome, and Fabius' command passed to the two consuls for 216, L. Aemilius Paulus and C. Terentius Varro. Hannibal had meanwhile moved to the deep south, to Cannae on the Apulian coast, and the consuls, trusting in the superiority of their legionaries, rushed to meet him.

In the battle itself the Romans appear to have had about 70,000 infantry, perhaps 55,000 heavy, but only 6000 horse, facing Hannibal's force of only 40,000 infantry, three quarters of it heavy, and 10,000 horse. As Hannibal had hoped, his cavalry on the wings pushed back the Romans and got behind the densely packed legions before they could drive through his center, his Gauls and Iberians gradually giving way but not

breaking. The result was a classic double pincer and the slaughter of the cramped Roman infantry. Varro and about 15,000 of his men escaped; Hannibal lost less than 6000 men, two thirds of them Gauls.

In the wake of Cannae Capua, the second city in Italy, and virtually all the Italian allies in the south revolted against Rome, but central Italy remained loyal, and Rome returned to a Fabian strategy. In 215 Syracuse defected and allied with Carthage and Philip V of Macedon, leading to the First Macedonian War (214-205). Even the loyal allies were running out of men to send, and Rome was compelled to double the tributum, the direct tax paid by Roman citizens. Things looked bleak.

The Senate, however, contained the Macedonian conflict to a side show in Greece by immediately destroying Philip's fleet, and understanding Spain was the strategic key to the war, they refused the temptation recall the armies sent there at the its outbreak. In 211 Syracuse and Capua were recaptured, and in 207 Hannibal's brother Hasdrubal, having brought 20,000 reinforcements from Span, was decisively defeated at the Metaurus river before he could link up with his brother. By 206 P. Scipio Africanus had secured the Iberian peninsula and two years later led an army to Africa, triggering the recall of Hannibal in 203. Rome had already won, but a final battle, pitting Scipio against Hannibal took place at Zama in 202; the Romans won and a peace was signed in 201.

Rome had prevailed because of her system of Italian allies, which supplied her with huge numbers of troops. Any other power in the Mediterranean (as in fact would be the case with Philip V and Antiochus III) would be compelled to negotiate having lost just a single battle of the scope of Trebia, Trasimene and Cannae. Rome could survive all three and continue to field armies. Knowing that he could not fight all of Italy or take Rome itself with his severely limited forces, Hannibal arrived as the proclaimed liberator of the Italian allies, without whom Rome would be reduced to a third rate power. So

successful was the Italian Confederation, however, that even after the utter disasters of the first three years of war the hard core of old allies in central Italy remained loyal, virtually guaranteeing the ultimate victory of Rome. Control of the sea, the learning curve of the Senate and the simply steadfastness of the Romans all helped, but in the end it was manpower and the success of the Roman system that defeated Hannibal's clearly superior generalship.

The Second Punic War was a major tuning point for both powers. Rome was now mistress of the western Mediterranean, and in less than a decade and a half she would defeat the last two states that could even think of challenging her power, firmly establishing the Roman Empire. The political and especially the economic effects of Hannibal's sojourn in Italy would, however, ultimately lead to the Roman Revolution (133-30) and the collapse of the republican government. Stripped off her imperial possessions, Carthage nevertheless remained a wealthy state, but her well-being was now completely in the hands of Rome.

Hannibal, who for generations would remain the ultimate boogeyman for Romans, fled east to the Seleucid court and served with Antiochus III in his war against Rome (192-188), his last battle being ironically a naval skirmish with the Rhodians. In 183 he committed suicide in Bithynia to escape extradition to Rome. The rump state of Carthage was itself destroyed in the Third Punic War (149-146), the city vaporized by a Rome that simply could not think rationally about the homeland of the man who had done her so much harm and brought her so close to extinction.

CONTENTS

1

INTRODUCTION

Hannibal: Rome vs. Carthage is a two-player game based on the 2nd Punic War between Carthage and Rome. One player is the Romans and the other is the Carthaginians.

These rules use a helpful numbering system which allows players to easily reference a certain rule. Throughout the rules, you will often see numbers inside parentheses, like "(18.1)" which means that some term in the rule has an explanation that you can find by looking for this reference number. Sometimes, however, the numbers inside parentheses will only reference a section (18.) as opposed to a section along with a subsection (18.1). This reference is not missing a number after the decimal but instead is referring to the whole section.

2

GAME COMPONENTS

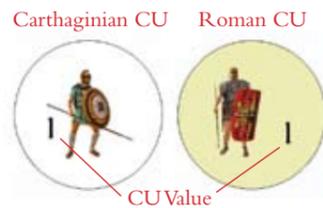

2.1 Inventory

A complete game of Hannibal includes:

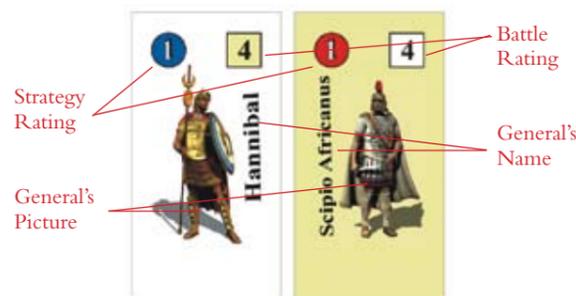

- 1 22" x 32" Map
- 3 Sheets of die-cut playing pieces
 - 86 Political Markers,
 - 66 Combat Units,
 - 14 Generals,
 - 13 City Markers
- 8 Tribe Markers (3 Carthaginian and 5 Neutral)
- 8 General Tokens
- 5 Siege / Subjugation Markers
 - 1 Proconsul Marker
 - 1 Siege Train Marker
 - 1 Turn Marker
- 64 Strategy Cards,
- 48 Battle Cards,
- 14 Plastic Stands,
- 2 6-sided Dice,
- 1 Rules Booklet.

2.2 The Playing Pieces

COMBAT UNITS: Each round playing piece that has a picture of a Roman, Carthaginian or Elephant printed on it represents a number of Combat Units of that type equal to its printed value. Throughout the rest of these rules, the term "Combat Unit" will be abbreviated as "CU" and pluralized as "CUs." CUs of value 1 can be used to make "change" for CUs of value 2, 3 and 5 (and vice-versa) at any point during play. The number supplied with the game is not an intentional limit (except the siege train and the elephants). Players may create more if needed.

GENERALS: Each rectangular playing piece represents a single General. Place Generals upright in plastic stands.

POLITICAL CONTROL MARKERS: The circular playing pieces, having a Roman and Carthaginian symbol printed back and front, are used to record which side has Political Control of a space. Throughout the rest of these rules, the term "Political Control Marker" will be abbreviated as "PC" and pluralized as "PCs." The square playing pieces are Walled Cities and the hexagonal pieces are Tribes. These two types of pieces act like PCs in all respects, except that both are more difficult to convert or remove (20.) and walled cities have many special characteristics that are described where appropriate throughout the rules.

TURN MARKER: The turn marker is used to indicate which turn it is on the Turn Record Chart on the board.

3

GLOSSARY OF GAME TERMS

The following are important game terms and abbreviations you should be familiar with before reading the rules:

Africa: All spaces in the four Provinces of Western Numidia, Eastern Numidia, Carthagina, and Carthage.

Spain (Hispania): All spaces in the four Provinces of Baetica, Celtiberia, Orospeida, and Idubeda.

Italy: All spaces in Gallia Cisalpinia, Etruria, Apulia, Latium, Campania, Lucania, and Samnium.

Army: An Army consists of a General and any number of friendly combat units stacked together in a space.

Holding Box: The square boxes on the map above each General's Special Ability.

Political Control (PC): A player controls a space if he has a PC in it. A player controls a Province if he controls the majority of the spaces in the Province. A space containing a PC remains under the control of the owning player, even if an enemy General and/or CUs are also present.

Province: A group of spaces located within a Province boundary line. There are 22 provinces in the game, but only 18 of them count for victory purposes (19.1).

Consul: A Roman General is either called a Consul or a Proconsul. Consuls outrank Proconsuls (18.).

Consular Army: An Army commanded by a Consul (18.1).

Operation Number: The number between 1 and 3 on the upper-left-hand corner of each Strategy Card, abbreviated as "OP" for the remainder of the rules and pluralized as "OPs."

4

SETTING UP THE GAME

Place the Turn Marker in the turn 1 space (218 B.C.) on the Turn Record Track, and set up the playing pieces as indicated below.

4.1 Roman Setup

8 CUs and Consul Publius Cornelius Scipio in Rome (Latium).

8 CUs and the Consul Tiberius Longus in Agrigentum (Sicilia).

Place Roman PCs in each space on the map colored red. Place hex shaped PCs in the hex spaces and place Walled City Markers in the square spaces that match their name.

The seven other Roman Generals are set aside. They will enter play later in the game as reinforcements. Place the eight round Roman General markers in a cup for random draw.

4.2 Carthaginian Setup

4 CUs and Hanno in Carthage.

10 CUs (two of which are CUs with Elephants) and Hannibal in Saguntum. Place Mago and H. Gisgo in Hannibal's Holding Box.

2 CUs and Hasdrubal in New Carthage.

Place Carthaginian PCs in each space on the map colored blue. Place hex shaped PCs in the hex spaces and place Walled City Markers in the square spaces that match their name.

4.3 Tribe Setup

Place the eight hexagonal Tribe Markers in the hexagonal spaces that match their color. There is no set place for each individual Tribe Marker

4.4 Event & Battle Decks

Separately shuffle the deck of 48 Battle Cards and the deck of 64 Strategy Cards and place the two decks off to the side. You are now ready to play.

5

SEQUENCE OF PLAY

Hannibal: Rome vs. Carthage is played in turns, each of which must be played in the following order:

5.1. Reinforcement Phase (Skip this phase on Turn 1). Players conduct the Reinforcement Phase in the following order:

- 5.1.1. The Carthaginian player places his reinforcements (6.1).
- 5.1.2. If the Carthaginian player has any Displaced Generals (10.10), he may return them all to the map, placing them with any Carthaginian CUs.
- 5.1.3. The Roman player places his Reinforcements (6.2). If this is turn six, he receives Scipio Africanus, plus five additional CUs.
- 5.1.4. The Roman player designates a Proconsul, removes his old Consuls, and randomly selects and places two new Consuls (6.4).

5.2. Deal Strategy Cards

Deal each player the number of Strategy Cards listed on the Turn Record Track

5.3. Strategy Phase

The players resolve this phase by “playing” their Strategy Cards one at a time, alternating back and forth between them (i.e., one player plays a card, then his opponent plays one). The Strategy Phase ends when both players have exhausted their hand.

5.4. Winter Attrition Phase

Both players conduct Winter Attrition against their CUs as (21.1).

5.5. Political Isolation Removal Phase

Both players (first the Roman, followed by the Carthaginian) remove all their non-walled, non tribal PCs which are Isolated (19.4).

5.6. Victory Check

Both players calculate their Political Points (22.1). If one player has less Political Points than the other player, that player will lose a number of PCs (22.2).

5.7. End of Turn

After completing the Victory Check, begin another game turn. Play continues until one side wins a Sudden Death Victory (23.) or all turns have been played.

6

REINFORCEMENTS

6.1 Carthaginian Reinforcements

One in Carthage, or with any General in Africa.

If New Carthage is friendly controlled, place one CU in either New Carthage or with a Carthaginian General in Hispania. (The city of New Carthage contained the workshops, shipyards and craftsmen that furnished Hannibal’s Army).

If the province of Baetica is friendly controlled, place one CU in either New Carthage or with a Carthaginian General in Hispania. (This province was rich in silver and financed much of the Carthaginian war effort).

One in any space that contains either a Carthaginian General or in Carthage or New Carthage

DISPLACED CARTHAGINIAN GENERALS: If there are any displaced (10.10) Carthaginian Generals, return all to the game after placing all Carthaginian reinforcements. They may be placed in any space containing one or more Carthaginian CUs that are not currently under siege.

6.2 Roman Reinforcements

The Roman player receives five CUs per turn. The CUs may be placed in Rome or with any Roman General(s). At least

three of the five Roman CUs must be placed in Italy. The CUs may all be placed in one space or split up in any fashion between Roman Generals and Rome. If the Roman player does not have at least one stack containing five or more CUs, then he must (if possible) place enough of his reinforcements in a space so a stack of five CUs is created (this is important for placing Consuls).

6.3 Restrictions on Placement

Reinforcements may not be placed inside a besieged Walled City (see 20.4 for the definition of besieged). An enemy General without CUs does not restrict the placement of reinforcements and would be displaced (10.10) if reinforcements are placed in that space. If Rome is besieged and all Roman Generals are inside Rome, then the Roman player does not receive any reinforcements, except those arriving with Scipio Africanus. The same is true with the area-specific Carthaginian reinforcements – if New Carthage is besieged and all Carthaginian Generals in Spain are inside that city, then the Carthaginian player would lose those two CUs.

6.4 Electing Consuls and Proconsuls

Rome in 218 B.C. was a republic ruled by the Senate. Wishing to avoid the pitfalls of kings and dictators, the Senate was very careful not to give too much power to military leaders. As such, during a war they would elect two Consuls each turn to lead the Army or armies. At the end of each turn two new Consuls would be elected, but in some cases a Consul would be allowed to remain with his Army if the situation required it (or if he was doing well), in which case the Senate made him a Proconsul.

PROCEDURE:

The Roman player, during the Reinforcement Phase of each turn (except the first), must follow the procedures below for his Generals:

- 6.4.1 Designate one of the Roman Generals currently on the map as a Proconsul. (This is optional but recommended. The Roman player is not required to designate a Proconsul, but it allows him to have an extra General in play if he does.)
- 6.4.2 Remove the other Roman Generals from the map (except Scipio Africanus, if in play).
- 6.4.3 Randomly draw two Generals to be your Consuls for the turn (those removed in step 2 are eligible to be drawn again).

- 6.4.4 Place your two new Consuls on the map. Note that the two Roman Generals on the map at the start of the game are Consuls.

6.5 Consul Placement

Consuls may be placed together or in separate stacks but must be placed in a space containing at least five Roman CUs (if there is only one such space, then both Consuls must be placed together). A Consul may be placed with a Proconsul, in which case the Proconsul becomes a subordinate (9.2). Roman Consuls may be placed inside a besieged Rome (Roman CUs may not) if there is no other legal space they may be placed in.

6.6 The Proconsul

A Proconsul remains on the map with his current Army. You are only allowed one Proconsul in play at a time (until the arrival of Scipio Africanus). Each Reinforcement Phase, you may elect to keep your Proconsul or dismiss him in favor of designating one of your departing Consuls as a Proconsul instead. Indicate which General is your Proconsul by placing the Proconsul Marker in his Holding Box.

Proconsul Marker

6.7 Scipio Africanus

Scipio Africanus arrives in play on turn 6 (211-210 B.C.) as a second Proconsul. He brings with him five CUs that are in addition to the five CUs the Roman player normally receives. Scipio and his 5 CUs must be placed as a group; they may not be split up. The Roman player can place Scipio’s Army in any space in Italy that contains a friendly PC and no enemy CUs, or in any port space in Spain that contains a friendly PC and no enemy CUs. Scipio’s Army arrives after the normal five CUs have been placed and before the two new Consuls have been elected. He may not be placed inside a Walled City. If there are no such spaces on the map on turn 6, Scipio Africanus and his Army never enter the game.

Once on the map, Scipio acts as a permanent Proconsul for the Roman player, allowing him to have two Proconsuls in play.

7

THE STRATEGY PHASE

7.1 Receiving Strategy Cards

Each player is dealt a number of cards from the Strategy Deck during each turn (seven cards each on turns 1-3, eight cards each on turns 4-6 and nine cards each on turns 7-9).

7.2 Two Options for Each Card

Each card played (which we will call “play” from now on) allows the player to use either the Operation Number (OPs) on the card (8.2), or cause the event on the card to occur. If you wish to do neither, you may discard.

7.3 Who Goes First

Normally the Carthaginian player decides who will play first, but if the Roman player has a Major or Minor Campaign Card in his hand and will play it (as an Event or an Operations Card) for his first play in the Strategy Phase, he may choose to go first. Follow this procedure:

The Carthaginian player first asks the Roman player if he is using a Campaign Card to play first. If not, then the Carthaginian player declares who will move first.

7.4 Ending the Strategy Phase

The players continue to alternate playing Strategy Cards until all cards in each player’s hand have been played. At this point, the Strategy Phase ends. It is possible that one player may use all of his Strategy Cards while his opponent still has several left in his hand. In this case, the player who still has Strategy Cards plays them one at a time until he has played all of them.

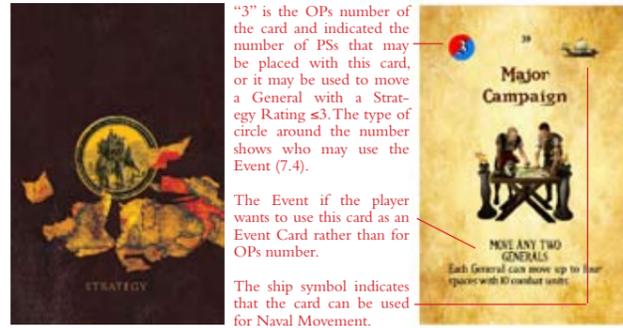

8

STRATEGY CARDS

8.1 Description

Each Strategy Card has two primary elements, a number between 1 and 3 in the upper left corner (called the Operation Number or OPs) and an event. The OP number is used to activate Generals or place PCs. The event is only available if the operation number is not used. A ship symbol in the up-

per right corner (on OPs 3 and Campaign Cards) indicates the card can be used for Sea Movement

“3” is the OPs number of the card and indicated the number of PSs that may be placed with this card, or it may be used to move a General with a Strategy Rating ≤3. The type of circle around the number shows who may use the Event (7.4).

The Event if the player wants to use this card as an Event Card rather than for OPs number.

The ship symbol indicates that the card can be used for Naval Movement.

8.2 Using the Operation Number (OPs)

The OPs on the card allows you to do one of the following:

- a **MOVE A GENERAL:** (with or without CUs) whose Strategy Rating is less than or equal to the OPs number.

EXAMPLE: An OPs of “1” can only move a General with a Strategy Rating of 1. An OPs of “2” can move a General with a Strategy Rating of 1 or 2. A “3” can move any General.

- b Place a quantity of PCs on the map equal to the OPs number. One PC can be placed in each space that doesn’t contain an enemy CU or PC.

EXAMPLE: If you play an OPs of “3”, you could place three of your PCs.

- c **RAISE TROOPS:** This is only allowed with an OPs “3” card. Playing a “3” card in this way allows the player to place one CU with any one General who is located in a friendly controlled space in a friendly controlled province. You may not raise troops in a besieged Walled City (rule 20.5).

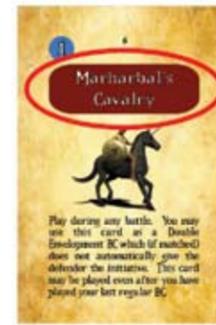

8.3 Events

The OPs of each Strategy Card is color-coded to reflect who can cause the event to happen. Events playable only by the Romans have a red background; Carthaginian events have a blue background. Events that can be played by either player have a half-red, half-blue background. Regardless of the icons depicted, either player can use the operation number of any card.

8.4 Counter Events

Counter Events have their title printed in white letters in a brown oval and can be played in the middle of a play or battle.

Counter Event Card

Playing a Counter Event does not count as your normal play; you must still play the next Strategy Card (if you have one). In effect, playing a Counter Event does not count as your normal play. When it is your turn to play, you must still play another Strategy Card (if you have one). In effect, playing a Counter Event may mean you have nothing to do in the later plays of the Strategy Phase.

Note that the two Hostile Tribes Event Cards (#7 and #8) may be used as a Counter Event or played during your turn if your opponent’s Army is still in Liguria or Gallia Transalpinia.

8.5 “Remove if Played” Cards

When an event happens that states “REMOVE IF PLAYED”, the card must be removed from the Strategy Deck after it is played because the event may only occur once per game. Place such cards apart from the discard area so that they are not reshuffled with the regular deck.

There is one event which is removed if it happens twice - Philip of Macedonia. The second playing of the card essentially cancels the effect of the first use of the card and, thus, that effect is no longer part of the game.

A “REMOVE IF PLAYED” card is not removed if used only for the OPs and the event does not happen.

8.6 Discarding

You may discard a Strategy Card rather than play it. In this case no action occurs and it now becomes your opponent’s turn to play a Strategy Card. Discards must be played face up for your opponent to see.

8.7 Reshuffling

If there are not enough Strategy Cards in the Strategy Deck to deal a full hand to each player for the upcoming turn, reshuffle the entire Strategy Deck (excluding cards that have been permanently removed from play) before any cards are dealt. The deck is also reshuffled when the Truce card is played

or discarded (it doesn’t matter if the event is used or not). In this case, the deck is reshuffled at the end of the turn.

9

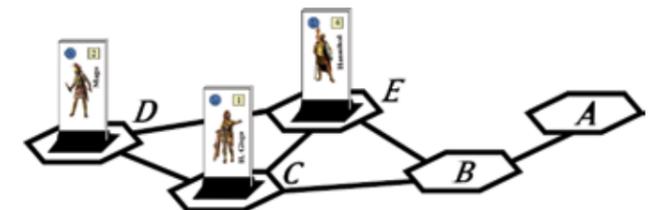

STACKING AND SUBORDINATION

9.1 Stacking CUs

There is no limit to the number of CUs that can be stacked in a space.

9.2 Stacking Generals

There can be more than one General in a space, but only one can be the commanding General. All other Generals in the same space are considered subordinates. Keep the commanding General on the map, and place the subordinates in the commanding General’s Holding Box on the board. For example Hanno and M. Gisgo are subordinates to Hannibal at the start of the game. When a commanding General moves, the subordinate Generals freely move with him. A subordinate in a commander’s Holding Box does not affect the commander in any way. While acting as a subordinate, his Special Abilities (24.) may not be used.

EXAMPLE: Hannibal, with Gisgo and Mago as subordinates, started in “A” and was moved through B,C,D to E. The Carthaginian player dropped off Gisgo and Mago (with CUs) in C and D.

9.3 Rank

Normally, the owning player may decide which of his Generals will be the commander and which will be the subordinate, and he is free to change the commander before he activates the Army. However, if one General “outranks” another, then the ranking General must be the commander. Hannibal outranks all other Carthaginian Generals. Consuls outrank Proconsuls. If two Consuls are in the same space, a change of command roll may be required (18.2).

10

MOVEMENT

10.1 Who May Move

Generals may move with or without CUs. CUs cannot move unless accompanied by a General. A General can be moved only when a Strategy Card is played that permits it. A General and the CUs stacked with him are collectively called an "Army." Only one Army moves with each Strategy Card, unless a Campaign Card is played (10.11). The same Army may be activated each Strategy Card play.

10.2 Movement Procedure

You can move a General up to four spaces (six spaces with a Force March Strategy Card). A General can move with up to ten CUs. As you move a General, you can pick up and drop off CUs along the way, so long as there are never more than ten CUs moving with the General at any time. You may move a General into any space that is adjacent (i.e., connected by a line) to the space that the General occupies. The sequence below must be observed when moving an Army:

- 1 Select the General you wish to activate. If there are two or more Generals with an Army, you may designate which is the commanding General (under the restrictions of 9.3). Then select up to 10 CUs and any number of subordinates to accompany the commanding General.
- 2 Play a Strategy Card that can activate the commanding General (8.2).
- 3 Move the Army. As the Army enters each space, it may trigger a Reaction Phase (10.3) for the non-active player, which is conducted before proceeding to step 4.
- 4 If the non-active player was successful with an Interception (12.), the active Army has the option to back up one space and end its move (12.5).
- 5 If there is only one enemy CU in a space, the active Army may conduct an Overrun at this time. (10.5)
- 6 Repeat steps 3 - 5 until the activated Army has completed its move.
- 7 The Army may now conduct one of the following: either a siege /subjugation attempt (20.) or a battle (14.) however, an Army may never conduct a battle and then a siege or subjugation on the play of a single Strategy Card.

10.3 Reaction Phase

Each space an Army enters may trigger a possible reaction by the non-Active Player. This is called the Reaction Phase and follows this sequence:

- 1 If the space contains a Walled City, the non-active player declares his CUs inside or outside the city and moves them above or below the Walled City Marker as appropriate. (10.7)
- 2 The non-active player declares all his Interceptions (12.) and Avoid Battle (13.) attempts. All must be declared before any are carried out and the non-active player is required to attempt all those he designates.
- 3 If an Avoid Battle is declared, the non-active player must roll for its success and, if successful, move the Army from the space.
- 4 If any Interceptions are declared, the non-active player must conduct them now (in any order he wishes). An Army Intercepting into a space may not enter inside a Walled City, since non-phasing CUs can only enter Walled Cities during step 1 above.

10.4 Enemy Occupied Spaces

When you move an Army into a space containing one or more enemy CUs, and those enemy CUs do not, cannot, or fail to Avoid Battle (13.) your Army must stop, end its movement, and battle the enemy force (exception: 10.5). A General without an Army may not move into a space containing an enemy CU nor stop in a space containing an enemy General without an Army (he may pass through such a space).

10.5 Overruns

If your Army has at least five CUs and it enters a space containing a single enemy CU without a General, the enemy CU is automatically eliminated with no loss to you. This is not considered a "battle", so you do not deal out Battle Cards (14.). Your Army can continue its movement with no loss to its normal movement allowance. There is no restriction on the number of times your Army may do this in a single turn - it is only limited by the General's movement ability. But this only happens when at least five CUs enter a space with only one enemy CU. Two CUs cannot be overrun by 10 CUs.

10.6 Mountain Passes and Straits

Movement across mountain passes (Alps and Non-Alps Passes) and across straits costs two instead of one from your General's movement capability.

MOUNTAIN PASS ATTRITION: Each time an Army crosses a mountain pass, it must roll for attrition (21.1) immediately after crossing the pass. If the mountain pass was a Non-Alps Pass, modify your die roll by -2. There is no modifier for crossing an Alps Pass.

STRAITS: Movement across the Strait of Massena is allowed only if you control both Rhegium and Massena. Notice that both players could use naval movement between these ports. Movement across the Strait of Sardinia is allowed, regardless of control.

OTHER AFFECTS: Interception (12.), Avoid Battle (13.), Withdrawals (16.) and Retreats (15.) are prohibited across mountain passes (both types) and straits.

10.7 Walled Cities and Movement

Players should consider a Walled City as a space within a space. Generals and CUs can be inside or outside of the city. The number of CUs that can fit inside a city is limited; Rome and Carthage can hold 5 CUs, and all other walled cities can hold two CUs. To indicate CUs are inside a Walled City, place them beneath the Walled City Marker. Those on top of the marker are considered outside the city. Generals inside a city can be placed to the side of the Walled City Marker. CUs that remain outside of the city stop enemy movement; CUs inside the city do not. You may move your CUs and Generals from inside a Walled City to outside of a Walled City (and vice versa) in the following situations:

ACTIVE PLAYER: Through normal movement (the play of a Strategy Card) during your player turn. Movement into a city is usually the last act of a moving Army (10.2).

NON-ACTIVE PLAYER: If an enemy Army enters a non-besieged Walled City space and the non-active player has CUs or Generals there, he may declare the CUs and/or Generals "inside" or "outside." His decision may change each time an enemy force enters the space.

10.8 Combining Armies

An activated General may pick up another General (with or without CUs) and keep moving. The General being picked must become a subordinate for that move. A General that outranks the activated General may not be picked up. If a General ends its move in a space containing another General and the new General outranks the activated General, then the activating General becomes a subordinate. If a General ends its move in a space containing another General of equal

rank, then the activated General becomes the commanding General and the other General becomes a subordinate.

10.9 Dividing Armies

An Army may drop off subordinate Generals (with or without CUs) at any time. A subordinate in the commanding General's Holding Box may be activated and moved off with as many CUs from the commanding General's Army as the controlling player wishes (exception 18.1). Place the subordinate onto the map and use the space occupied by the commander as his starting space. The subordinate becomes the commanding General of this new Army and may bring along other subordinates that do not outrank him. A subordinate that detaches and moves off counts as moving one General (i.e., activating a subordinate does not allow the commanding General to move).

10.10 Displaced Generals

A General becomes displaced if an enemy Army enters the General's space and the General is not accompanied by friendly CUs. A General also becomes displaced if all CUs accompanying the General are eliminated due to Retreat Table casualties, Retreat losses, or the Naval Table. A General is not displaced if all CUs under his command are removed due to the Attrition Table, the Storm at Sea event (#60), or the Battle Casualties die roll.

If Scipio Africanus is displaced, he is eliminated.

If Hannibal is displaced, he is eliminated and the Carthaginian player must remove 5 PCs from any spaces on the map. This is in addition to any PCs losses resulting from the battle that led to Hannibal's death.

Aside from these two, a displaced General is removed from the map and returns to play in the next Reinforcement Phase (5.1).

10.11 Campaign Card Limitations

- a When a Campaign Card is played, more than one Army can be activated.
- b Each commanding General must complete all movement and battles before another General can be activated. A CU or subordinate moved by one General during a campaign can be moved by another General during the same Campaign as long as no CU or General moves more than four spaces (exception: Nero 10.12).
- c Once an Army participates in a Battle, siege/subjuga-

tion, or backs up one space to avoid being Intercepted (12.5), or fails its Pursuit die roll (13.4), all CUs and Generals in the Army are considered to have spent all their movement capability and may not be moved by another General during that campaign.

- d A Campaign Card cannot move one General multiple times.

SIEGES AND SUBJUGATION: A Campaign Card cannot be used to conduct more than one siege or subjugation against the same walled city or tribe, but it could be used to battle the defenders from the space and then used again to conduct a siege or subjugation against the site, as long as a different General performed each action.

10.12 Nero

Nero has the special ability to move 6 spaces during campaigns. An Army commanded by Nero has the special ability to move 6 spaces during campaigns.

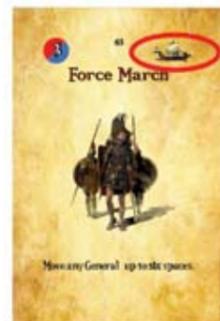

11

NAVAL MOVEMENT

11.1 Procedure

A General (with or without CUs) may move from a port space to any other port space using Naval Movement. CUs by themselves may not use Naval Movement. Naval Movement is possible when a 3-Strategy Card or a Campaign event is played (a ship icon appears in the upper right-hand corner of such cards for easy recognition).

Naval Movement Card

The movement cost to use Naval Movement is equal to three spaces.

EXAMPLE: You can move one space to a port and then use Naval Movement; or you can start at a port, use Naval Movement and then move one space inland.

11.2 Enemy Controlled Ports

Control of a port is not necessary for embarkation or disembarkation. Naval Movement is allowed into and out of any port space, including a port that contains an enemy PC or CUs.

11.3 Naval Movement and Walled Cities

Naval Movement directly into a Walled City (as opposed to simply landing outside the city) is allowed if the walled city is friendly controlled and not currently besieged (see 20.4 for definition of "besieged"). Naval Movement is prohibited into and out of besieged Walled Cities. Note that this does not prevent Naval Movement into and out of a space containing a besieged walled city (in this case the troops are considered embarking or disembarking outside the city walls).

11.4 Sea Movement Limit

A Major or Minor Campaign Card event allows an Army with up to 10 CUs to use naval movement (only one of the two or three armies that may move with a Campaign Card can use Naval movement). A 3 OC allows one Army with up to five CUs to use sea movement.

11.5 Roman Naval Supremacy

The Roman player enjoys naval supremacy, so any Carthaginian Sea Movement runs the risk of being sunk. Each time a Carthaginian General or Army moves by sea, the Roman player rolls on the Naval Combat Table. If, after applying the appropriate die roll modifiers, the force is sunk, then the CUs are eliminated and the General is displaced (10.10). If the force must return, it returns to the port of embarkation and the balance of its movement is lost. CUs lost at sea do not count towards Political Consequences (rule 15.5).

11.6 Naval Combat Table Modifiers

The Roman player modifies his Naval Combat Table die roll appropriately:

- +/- both port modifiers* (see map)
- 1 if a general is moving without CUs or if the army using Sea Movement contains only one CU.
- +1 if the port contains a Roman PC*
- 1 if Carthage controls Syracuse†
- 1 if Macedonia is allied with Carthage (Event #9)†
- 1 if the Carthaginian Naval Victory (Event #29) is in effect†

*These modifiers apply to both the port from which the Army departs and the port at which they disembark, and they are cumulative.

†These modifiers may or may not be in effect. Check the Carthaginian Naval Movement Modifiers chart to see if they are in effect.

EXAMPLE: Your Carthaginian opponent sends an Army from Carthage (port modifier: -2) to New Carthage (port modifier: 2); the cumulative modifier is -4.

EXAMPLE: He sends an Army with only one CU (-1) from New Carthage (-2) to Rhegium (+1). Rhegium contains a Roman PC giving you another +1 modifier. The net modifier is (-1) + (-2) + (+1) + (+1) = -1.

12

INTERCEPTION

12.1 In General

Interception is a special kind of movement that allows a non-active Army to advance one space during an opposing General's move and interrupt the movement of the enemy Army. Interception forces the moving Army to fight a battle (14.) or back up one space (12.5).

12.2 When Can an Interception Occur?

Any Army controlled by the non-active player may attempt Interception whenever an enemy Army or General enters (via land or naval movement) a space adjacent to the Army and the space does not contain any non-moving enemy CUs. An Army may attempt Interception each time the above condition occurs, for example if an enemy Army tried to move around your Army you could attempt to Intercept in each adjacent space which did not already contain an enemy CU.

EXAMPLE: Fabius moves to attack Gisco. When Fabius enters space "A" both Hannibal and Gisco can attempt to intercept. When Fabius moves into Gisco's space, Gisco cannot intercept, but Hannibal and Mago can.

12.3 Interception Restrictions

You may not Intercept into a space that contains one or more non-moving enemy CUs.

You may not Intercept across a Mountain Pass or Strait.

Interceptions may only occur against movement.

You cannot Intercept an attempt to Avoid Battle (13.1), a Withdrawal (16.), or a Retreat (15.), nor may you Intercept an Interception.

12.4 Interception Attempt Die Roll

To Intercept, declare what General and how many CUs are attempting, then roll the die. Modify the die roll by +1 if the space your Army is Intercepting into contains an enemy PC and no friendly CUs. If the modified die roll is less than or equal to your commanding General's Battle Rating, the Interception attempt is successful and you must move the General and all CUs you declared were participating, into the space. In a battle caused by a successful Interception, the Intercepting player receives one extra Battle Card to simulate the effects of surprise. One is the maximum benefit, even if two or more armies Intercept. The original active player will still play their BCs first in the battle, not the intercepting non-active player.

12.5 Backing Up One Space

An Army which is Intercepted is never required to give battle; it may instead back up to its last-occupied space and end its movement. If an Army has to back up across a pass, it must roll for attrition again. If an Army has to back off from a sea move, then it returns to its port of embarkation. If it were a Carthaginian sea move, the Carthaginian player would have to roll again on the naval combat table. If the result is a Return than the Carthaginian player may not back up and must land in the port space and be Intercepted. If an Army backs up on to an enemy Walled City or Tribe space, it may still conduct a siege or subjugation on that site.

12.6 Multiple Interceptions

You may conduct more than one Interception attempt into the same space if you have more than one Army adjacent to the space your opponent is about to enter. In this case, you must declare all Interception attempts before any are resolved, and your opponent may wait until all are resolved before he decides to give battle or back up. If both/all Interceptions succeed, then the armies are combined in the space under

the command of one General and the combined force faces the moving Army.

12.7 Subordinates and Interceptions

You may dispatch a portion of your Army (under a subordinate or the commander) for an Interception. You must declare which General and how many CUs will make the attempt. No matter how many subordinates an Army has, only one Interception can start from each space (i.e., you may not make two or more Interception attempts from the same space in hopes that at least one will make it). If a subordinate Intercepts, the commanding General must be left behind with at least one CU (note that Consuls may not be voluntarily left with less than 5 CUs [18.1]). After the effects of the Interception have been resolved, the ranking General still maintains command of the Army. If the army consists of two equally ranked Generals, the controlling player may choose the commanding General.

12.8 Interceptions and Walled Cities

An Army inside a Walled City may Intercept an Army in an adjacent space if there is no enemy CUs outside the Walled City. Conversely, if you Intercept an Army that enters a Walled City space by land movement, the battle occurs before the Army can enter the walled city. If the Army entered the Walled City space via naval movement, the Intercepted Army has four options: accept battle, move into the walled city (if the city can fit the Army), back up to the port of embarkation, or split the Army between the last two options. An Army backing up one space may never leave behind CUs outside the walled city.

12.9 Interceptions and Overruns

Overruns occur after Interceptions, so an Intercepting Army may prevent an overrun.

12.10 Failed Interceptions and Avoid Battle

If an Army fails an Interception attempt, it is prohibited from attempting an Avoid Battle (13.) against that same Army during the current card play. The Army that failed the Interception may still attempt other Interceptions without restrictions, and may even attempt to Avoid Battle against other armies if the current play is a Campaign Card.

13

AVOIDING BATTLES AND PURSUIT

13.1 Avoid Battle

This option is available to the non-active player only. If an enemy Army enters a space containing one of your armies, or one or more of your Generals without CUs, you may attempt to Avoid Battle. To determine if the attempt succeeds, roll the die. If the die roll is less than or equal to your commanding General's Battle Rating, the Avoid Battle succeeds. A successful Avoid Battle allows you to move your Army or Generals out of the space and into any adjacent space (see restrictions below). If the die roll was greater than the commanding General's Battle Rating, then the Army remains in the space and a battle is resolved, with the failing Army receiving one less Battle Card for the loss in moral a failed retreat would involved. Generals without CUs who fail to Avoid Battle are displaced.

13.2 Restrictions on Avoiding Battle

No more than 10 CUs may Avoid Battle. An Army that contains more than 10 CUs must leave behind all CUs in excess of 10. CUs and Generals that failed an Interception attempt may not attempt to Avoid Battle against the same Army in the current round (12.10). An Army or General avoiding battle;

- a may leave CUs and/or Generals behind (as long as 18.1 is not violated)
- b may not cross a mountain pass or strait.
- c may not enter a space containing an enemy CU or PC.
- d may not enter the space from which the enemy Army is advancing.
- e may not enter a non-friendly tribe space.

13.3 Subordinates and Avoid Battle

You may Avoid Battle with a subordinate. In this case the commanding General must be left behind with at least one CU (or 5 CUs if leaving behind a Consul 18.1). Only one Avoid Battle attempt is allowed per Reaction Phase, so Generals may not split up and Avoid Battle into different spaces, nor may you Avoid Battle with one General after failing with another.

13.4 Pursuit

After a successful Avoid Battle, the active player may attempt to continue moving (either to pursue or to move off in a different direction). To determine if the attempt is successful, roll the die. If the die roll is less than or equal to your General's Battle Rating, your Army can continue to move. If your General has already moved the four-space limit (or six spaces if moving with a Force March card), or the die roll is greater than his Battle Rating, then your Army must stop in its current space. If your Army pursues the Army that avoided battle, then your opponent can try to Avoid Battle again, and you may attempt to pursue again. This can continue until your opponent fails his Avoid Battle die roll or your General has moved his limit.

13.5 Walled Cities and Avoid Battle

An Army located on a Walled City space but currently outside the city has two options. The controlling player may declare the Army inside the city when the enemy Army appears or he may declare the Army outside the city and attempt an Avoid Battle. The first case would not slow the movement of the enemy Army, but the second case might (if the Avoid Battle succeeds and the pursuit does not). If the Avoid Battle is successful, the Army located on the Walled City space may then move into the Walled City.

13.6 Sieges/Subjugation and Pursuit

An Army that fails its pursuit die roll but ends its move on a Walled City or Tribe space may still conduct a siege or subjugation against the site.

Each player draws a number of BCs as described below:

A number of BCs equal to the commanding General's Battle Rating (if a General is present).

One BC for each CU he has present in the battle.

One BC for a successful Interception (12.4).

One less BC for the defending Army if it unsuccessfully attempted to Avoid Battle (13.1).

A variable number of BCs for Allies (14.2)

The Roman player receives two BCs for any battle in Latium (14.4)

One BC if the battle space contains a friendly Tribe (20.9)

20 CARD LIMIT: Regardless of other factors, a player's maximum BC hand size (before consideration of any possible reduction for an elephant charge) is 20 cards. Any additional BCs beyond 20 are forfeit. After every battle ends, all BCs are shuffled back together into a single deck, from which subsequent battles will draw.

14.2 Allies

Players receive additional BCs for having allies. A player gains allies by having Political Control of provinces (determined at the moment of the battle). Each province is worth one BC, except Eastern and Western Numidia, which are worth two each. Some Allies will not venture beyond their province, so their BC bonus is only available inside the province. However, allies in Africa, Spain, and Italy (see glossary 3.) are available in any province within their country (these countries are color coded on the map).

ISLAND PROVINCES: Allies on islands (Balearic Islands, Sicily, Syracuse, Sardinia/Corsica) are only available for battles on that island. Sardinia and Corsica are considered one island for this rule.

14

BATTLES

Battles are initiated when the moving player moves an Army into a space containing enemy CUs and those enemy CUs do not, cannot or fail to Avoid Battle. A Battle forces the moving Army to stop and end its movement. Battles are resolved using Battle Cards. After the Battle is over, all BCs are shuffled back into the Battle Card Deck.

14.1 Battle Cards (BC)

Battles are resolved using Battle Cards.

EXAMPLE 1: Carthage controls three provinces in Spain while Rome controls one. No matter where the battle takes place in Spain, the Carthaginian Player will receive three BCs for allies while the Roman Player will receive one.

EXAMPLE 2: The battle is in Africa. Carthage controls Carthage and Carthagina, while Rome controls Western Numidia. In this case, both players would receive two BCs for allies.

EXAMPLE 3: The battle is in Sicilia, which is outside of Italy. Whoever controls Sicilia would receive one BC for allies and who ever controls Syracuse would receive one BC. No other allies are possible.

14.3 Restrictions on Allies

GENERALS: You may only receive bonus cards for allies if you have a General in the battle. If multiple battles occur in the same province or country during the play of a Campaign Card, all battles receive the bonus for allies, as long as they have Generals present.

ITALIAN ALLIES: The Roman player may never receive more than two BCs for allies in Italy and may not count the province of Latium for allies. This reflects that these provinces are already supplying the Roman Legions with recruits and so are already reflected in the design. The Carthaginian player can have up to six BCs for allies in Italy (Campania, Lucania, Apulia, Samnium, Etruria and Gallia Cisalpinia).

EXAMPLE: The battle is at Cannae, in Italy. The Carthaginian player controls Gallia Cisalpinia and Lucania. The Roman player controls Campania, Samnium and Etruria. Neither side controls Apulia. Both sides would receive two extra BCs for allies.

14.4 Militia

Rome receives two extra BCs for any battle that occurs in Latium (this is in addition to any BCs for Italian Allies). This militia is available, even if there is no General present in Rome.

14.5 Sequence of Battle Resolution

The active player begins as the attacker and the non-active player as the defender. Each battle is conducted separately, so the identity of the attacker and defender can change from battle to battle (and indeed, from round to round during a battle). Prepare for battle using this sequence:

- 1 Change of Command die roll (18.2)
- 2 Attacker declares battle-related Strategy Cards.
- 3 Defender declares battle-related Strategy Cards.
- 4 Elephant charge declaration (17.) and charge die-roll, unless Elephant Fright (Event #42) is immediately played before die roll.
- 5 Deal BCs, display cards revealed by Spy in Enemy Camp (Event #20) and begin battle.

14.6 Battle Round

A battle is fought in Battle Rounds. In each battle round, first the attacker plays a BC and then the defender must play a BC that Matches (14.7) the attacker's BC. If the defender is unable or unwilling to match the attacker's BC, he loses the battle. If the defender's BC matches the attacker's BC, another battle round must be played. The players continue playing out battle rounds until one wins.

14.7 Matching the Attacker's Battle Card

The defender matches the attacker's BC by playing one of exactly the same type. Thus a Frontal Attack card is matched by another Frontal Attack card, a Probe card is matched by a Probe card, and so on.

BATTLE TIP: If you are the attacker, usually the best card to play is the type that is predominant in your hand. With only 48 cards in the Battle Card Deck, if you have many of one type, your opponent is likely to have only a few. Examine the chart at the end of this rule booklet for the number and type of cards in the Battle Card Deck.

14.8 Counterattacks

After each battle round, the defender may attempt to counterattack. If successful, he becomes the attacker in the next battle round, and the former attacker becomes the defender. To attempt a counterattack, the defender rolls the die. If the die roll is less than or equal to his commanding General's Battle Rating, he has seized the initiative and become the attacker. If the die roll is greater than his General's Battle Rating, he fails and remains the defender in the next battle round.

DOUBLE ENVELOPMENT EXCEPTION: If the attacker plays a Double Envelopment and the defender matches it, then the defender can automatically (though its not mandatory) gain the initiative and become the attacker (the Double Envelopment tactic was a difficult and dangerous tactic to attempt). *Note that this would be the only way for a force with no General to become the attacker.*

14.9 Reserve Cards

There are four Reserve cards in the battle deck. These cards are wild cards that may be used as any of the other five types of cards (Frontal Assault, Flank Left, Flank Right, Probe or Double Envelopment). Reserve cards can be used by the attacker or by the defender (to match a card). When the attacker plays a reserve card, he must state which type of card it is representing and it takes on all characteristics of that card (i.e., a Reserve card used as a Double Envelopment will result in an automatic loss of initiative if matched).

14.10 How to Win a Battle

The attacker wins if the defender cannot or will not match his battle card.

The defender wins if the attacker has no BCs remaining at the beginning of a battle round (even if the defender also has no BCs remaining). *This is one reason the defender might wish to not roll for counterattacks!*

14.11 Battle Casualties

After the victor has been determined, players roll on the Attrition Table to determine the number of CUs that must be removed by both sides for Battle Casualties. The number of rounds that occurred in the battle determines the column to use on the table. The last round in the battle (the one in which the defender could not match the attacker) is counted as a full round. Players cross-reference the column with a die roll to determine the number of CUs eliminated.

Note: Because the number of rounds played affects the number of casualties, in some situations a defender may choose to not match the attacker's card, and thus "lose early." This is permitted.

EXAMPLE: The battle lasted four rounds and a "5" is rolled for Battle Casualties. The result is both players lose one CU.

CALCULATING ROUNDS: Failed Withdraw attempts (16.) do not count as a round. It is recommended that players keep the battle cards they play in separate piles, so that the number of rounds may be easily determined.

14.12 The Retreat Table

In addition to Battle Casualties, the loser of the battle will lose a number of CUs as determined by the Retreat Table. After each battle, the loser must roll the die and Consult the Retreat Table. The column on the left is used if the loser's

Army began the battle with less than or equal to four CUs. The column on the right of the Retreat Table is used if the loser's Army began the battle with greater than four CUs. Losses must be taken in CUs; they cannot be absorbed with allies or militia. The die roll is modified by +2 if the battle was won with a Double Envelopment or by -2 if won with a Probe.

ELEPHANT LOSSES: If there are elephant CUs in the defeated Army, the first CU removed must be an elephant CU. All other losses may come from non-elephant CUs. Note that a player could lose two elephant CUs in a battle if he lost the first with a die roll of 6 in Battle Casualties and then lost the second on the retreat table.

ALL CARDS EXHAUSTED: There is no die roll modifier to the retreat table when the attacker loses by running out of cards. Simply use the face value of the die roll on the retreat table.

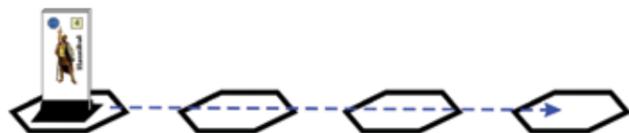

15

RETREATS

15.1 Retreat Procedure

After Battle Casualties and retreat table losses have been removed, the loser of a battle must retreat his force and suffer the political consequences of the defeat. The loser of the battle must retreat to a space that is both friendly controlled (contains a friendly PC) and clear of enemy CUs, or to a space that contains more friendly CUs than the retreating force. If you have more than one space that you may retreat your force to, you must pick the closest one (if two or more are equidistant, the retreating player may choose). You may not leave behind any CUs or Generals as you retreat, and any friendly CUs encountered along the retreat path (if they do not outnumber the retreating CUs) are swept up in the retreat and become part of the retreating force. The 10 CU movement limit does not apply during retreats; any size force (commanded by a General or not) defeated in battle must be retreated.

RETREAT PATHS WHICH CAUSE CU LOSSES: A player may, at his option, choose a retreat path or destination which is not the closest if it will cause fewer CU losses (see 15.3) than the shortest path and does not violate rule 15.2.

An Army can retreat up to four spaces. A retreat must end on a friendly PC or a larger friendly force.

15.2 Restrictions on Retreats

The retreat may not cross a mountain pass (either type) or strait. The length of the retreat may not be more than four spaces. The retreat may not use Naval Movement. If the losing Army debarked in the battle space that round, it is eliminated.

Exceptions:

- If the battle space contains a Walled City friendly to the retreating Army, it is assumed the Army debarked in the city and marched out. The Army may therefore retreat into the Walled City. Any CUs which cannot fit inside the Walled City are eliminated.
- If the original attacker retreats, he must always retreat first into the space in which he entered the battle.
- If the original defender retreats, he is prohibited from entering the space from which the attacker entered the battle from during the full length of his retreat.
- The retreating force may never reenter the battle space during its retreat.

15.3 Penalties on Retreats

A retreating force (Army or CUs) must lose one additional CU for each space it enters that contains an enemy PC or non-friendly tribe. A force retreating into a space containing enemy CUs will lose an additional CU for each enemy CU in the space. A retreating force may not remain in a space with enemy CUs. Enemy Generals without CUs have no affect on retreats and cannot block retreat paths. A force that cannot retreat, has no place to retreat to, or must retreat more than four spaces is eliminated.

15.4 Retreats into Walled Cities

A retreating force is never allowed to retreat into a besieged walled city except the force (if any) that sorties from the city (20.7). A retreating force may retreat into a friendly controlled non-besieged city if the battle occurred in the Walled City space. If there are more CUs in the retreating force than the city can hold, then the retreating force may split up into two forces; one into the city and the other retreating to a legal retreat space. The commanding General and subordinates may accompany either force or be split up in any fashion

(be careful not to violate rule 18.1). This is the only way a retreating force may be split up.

15.5 Political Consequences

The loser must now remove a number of his own non-Walled City, non-Tribal PCs from the map equal to half (round fractions down) the number of CUs he lost in the battle (this includes Battle Casualties, Retreat Table losses, and CUs lost during the retreat). The PCs may come from anywhere on the map he wishes.

EXAMPLE: If the loser of the battle lost three CUs then he would have to remove one PC. If he lost only one CU he would not be required to lose any PCs. The loser will no doubt pick PCs in the least critical areas. This area would probably be receiving little attention and wealth from the controlling country and would be the first to rebel.

15.6 Sue for Peace

If, as a result of battle, the loser is unable to remove enough PCs to satisfy the Political Consequences of defeat, the player must instantly sue for peace, thereby losing the game (see rule 22.3).

16

WITHDRAWALS

16.1 In General

Withdrawals are a way for the current attacker (not necessarily the original attacker) to break off from a battle. To withdraw, the attacker must forfeit his chance to play a BC and roll less than or equal to his commanding General's Battle Rating. The defender can cancel the withdrawal by rolling less than or equal to his commanding General's Battle Rating (the defender is not required to roll). If the attacker's withdraw die roll was not successful, or if the defender canceled the withdrawal, the defender MAY immediately take the initiative and become the attacker. There is no limit to the number of times you may attempt to withdraw in a single battle.

16.2 A Successful Withdrawal

A successful withdrawal ends the battle and forces the withdrawing player to move his Army to an adjacent space (ex-

ception: units that sallied forth from a besieged walled city may withdraw back into it). Battle Casualties are resolved normally, but the Retreat Table is not used.

16.3 Restrictions on Withdrawals

- A withdrawing Army may not split up.
- An Army may not withdraw across a mountain pass (either type), strait or by sea.
- You may not withdraw into a space containing an enemy PC or enemy CU.
- You may not withdraw into the space from which the enemy Army entered the battle space. If the original attacker withdraws, then he must withdraw to the space from which he advanced.
- You may not withdraw into a space containing a non-friendly tribe.

17

ELEPHANTS

The Carthaginians used elephants as a shock weapon in battles. The sight of elephants charging was often enough to make many troops break and run. Some Roman Generals learned how to defend against elephants or to even turn them against their owners.

17.1 Receiving Elephants

There are four Carthaginian counters (a total of four CUs) that depict Elephants. Two begin the game with Hannibal and the others may arrive in Carthage with the play of the African Reinforcements Card (Event #12). The four counters are an intentional limitation, and may not be exceeded.

17.2 Properties

CUs with Elephants have all the same properties as regular CUs with Elephants have all the same properties as regular CUs (they may use Naval Movement) except that they provide a special attack capability to the Carthaginian player (17.3). When removing CUs lost because of Battle Casualties (14.11) or Attrition (21.), the Carthaginian player may pick any CUs he wishes, unless dictated to remove a CU with Elephants by an "e" result on the Attrition Table. When re-

moving CUs due to the Retreat Table (14.12), the first CU selected must be an Elephant CU.

17.3 Elephants in Combat

CUs with Elephants give the Carthaginian an opportunity to subtract BCs from the Roman at the start of a battle. If the Carthaginian player has CUs with Elephants present in a battle, he may declare an Elephant Charge which must be declared before the Carthaginian player looks at his BCs. The Elephant Charge is successful if the Carthaginian player makes a die roll greater than the Battle Rating of the Roman General in command of the opposing Army. If the die roll is less than or equal to the Roman General's Battle Rating, the Elephants have no effect (although the CUs can still be used in the battle). If there is no Roman General present, the Elephant Charge is unsuccessful on a die roll of 1.

17.4 Successful Elephant Charges

If the charge is successful, the Roman battle card hand is reduced by the number of Elephant CUs involved in the charge.

17.5 Rampaging Elephants

If a "1" is rolled, then the Carthaginian hand size is immediately reduced by one BC (no matter how many CUs with Elephants were involved in the charge). Being more familiar with elephants, an elephant reversal would not be as detrimental to the Carthaginian Army.

18

CONSULS AND CONSULAR ARMIES

Historically, the two Roman Consuls had no authority over each other. Each was given command of approximately equal forces and this caused considerable coordination problems when they needed to combine. It was not uncommon for Consuls to share command of the combined Army by allowing one to command one day and the other the next day.

18.1 Consular Armies

A Roman Army containing one or both Consuls is called a Consular Army. The Roman player may never take any voluntary action that would leave a Consul or a Consular Army

19

POLITICAL CONTROL

with less than 5 CUs. This means that a Consular Army may not exit a space and leave any CUs behind unless it brings at least 5 CUs with it. It also means that once both Consuls are together, they may not split up until the Consular Army contains at least 10 CUs. There is no penalty if a Consular Army falls below five CUs due to attrition, battle, or retreat; and if it does, it may not drop off or leave behind CUs until it again contains more than five CUs.

18.2 Change of Command Die Roll

If both Consuls are in the same Consular Army the Roman player may choose either one to move (command) the Army; the other becomes a subordinate. If this Army containing both Consuls enters battle as the attacker, the Carthaginian player may make a Change of Command Die Roll to see if the acting commander changes. If a Carthaginian Army attacks this Army, the Carthaginian player MUST make a change of command die roll.

PROCEDURE: Roll one die, if the die roll is 1-3, there is no change; if the die roll is 4-6, the commander and subordinate Consuls exchange positions.

EXAMPLE: The Consuls Marcellus and Varro are stacked together. The Roman player designates Marcellus as the commander and activates the Army. The Army moves to give battle. Before Battle cards are dealt, the Carthaginian player rolls a Change of Command Die Roll and rolls a "5". This results in the Consuls exchanging positions, and so Varro commands the Army for the battle.

18.3 Proconsuls and Consuls

A Consul outranks a Proconsul and whenever the Proconsul ends its move with a Consul he becomes a subordinate. However, an Army led by a Proconsul is allowed to be larger than the Consular Armies and may pass through, a Consular Army containing 5 or more CUs without restrictions. If an Army led by a Proconsul enters a space containing a Consular Army with less than 5 CUs it must either stop and ends its movement, or drop off enough CUs so the Consular Army once again has 5 CUs. A Proconsul that starts the turn stacked with a Consular Army may be activated and sent off with up to 10 CUs, or left behind with any number of CUs, as long as rule 18.1 is not violated.

19.1 Political Control

Players gain control of a space and control of a province through placement of PCs. A player controls a space if he has a PC in it. A player controls a Province if he controls the majority of the spaces in the Province (having the majority of the PCs in a province is not by itself sufficient for Political Control). The number of PCs required to control each of the 18 Provinces which earn Political Points is as follows;

In Africa

Carthage 1
Carthagina 4
Eastern Numidia 3
Western Numidia 3

In Italy

Lucania 3
Gallia Cisalpinia 3
Etruria 3
Latium 1
Samnium 3
Campania 2
Apulia 3

Others

Sicilia 3
Corsica / Sardinia 3
Syracuse 1

In Spain

Baetica 3
Celtiberia 3
Orospea 3
Idubeda 4

A space containing a PC remains under the control of the owning player even if an enemy General and/or CUs are also present.

19.2 Placing PC Markers

Strategy Cards can be played to place PCs on the map. The number of PCs that can be placed is equal to the OPs number. You can place PCs in any space that does not contain a PC or an enemy CU. Exception: You can "convert" a PC in a space containing an enemy PC (by flipping it over) if you have a CU in that space.

19.3 Characteristics of PC Markers

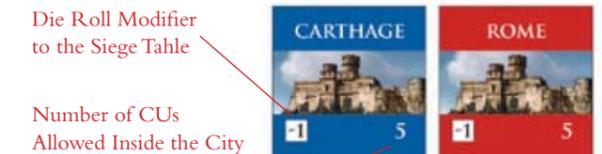

- PCs do not stop or slow movement of units.
- Interception attempts into a space containing an enemy PC and no friendly CUs are more difficult (12.4).

20

SIEGES AND SUBJUGATION

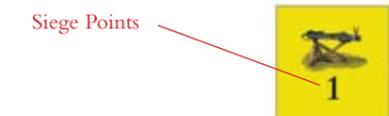

20.1 Converting Walled Cities and Tribes

Walled Cities and Tribes are PCs that are difficult to convert. The only way to convert a Walled City is to conduct a successful siege against it or to play an event card that affects it. The only way to convert/remove a Tribe is to subjugate it.

20.2 Siege and Subjugation Procedure

A siege or subjugation is a multi-turn process wherein an Army attempts to accumulate 3 siege points against the Walled City or Tribe respectively. Record accumulated siege points with the Siege/Subjugation markers.

A siege point is gained when an activated Army rolls well on the Siege/Subjugation Table. Any activated General which ends its move at an enemy Walled City or Tribe space containing at least three friendly CUs (already there or brought along) may conduct one siege or subjugation attempt (one die roll) against that site. A non-activated Army on top of a Walled City or Tribe is considered maintaining the siege but may not make a siege or subjugation die roll. No Tribe or Walled City may be subjected to more than one siege or subjugation attempt per Strategy Card played (i.e., a Major Campaign may not be used to direct three siege attempts against the same city).

20.3 Subordinates and Sieges/Subjugation

Subordinates may detach with 3 CUs from a besieging Army and make a siege attempt without activating the commanding General by simply announcing the subordinate is conducting the siege or subjugation. A subordinate conducting a siege or subjugation is considered temporarily in command and may use his special ability. If this occurs during the play

- You may not Avoid Battle into a space containing an enemy PC (13.2)
- A retreat must end in a space containing a friendly PC (15.1).
- An Army that Retreats through an enemy PC must remove an additional CU (15.3).
- An Army may not withdraw from battle into a space that contains an enemy PC (16.3).
- CUs on enemy PCs at the end of the turn suffer Winter Attrition (21.1).

19.4 Removing Isolated PC Markers

During the Political Isolation Phase, each player (starting with the Roman Player) must remove all his non-walled, non-tribal PCs that are isolated. A PC is isolated if the player cannot trace a path of spaces from the PC to a friendly CU or a friendly controlled Walled City, Tribe, or port.

A besieged Walled City can still supply other PCs. The path cannot cross a mountain pass, nor enter a space containing an enemy PC or neutral Tribe, unless a friendly CU is present in that space. The path may enter and exit a space that contains enemy CUs only if the space also contains a friendly PC.

EXAMPLE : Roman Political Markers A and B are isolated because they cannot trace a path across a mountain path or into a space containing an enemy PC or Neutral Tribe. The Roman PC in C is not isolated because it can trace to the combat unit in E. All Carthaginian PCs can trace to a friendly controlled port. The Roman Combat Unit has no effect on the Carthaginian PC in E.

of a Campaign Card, only 3 CUs (or 5 CUs for a Consul) plus the activated subordinate are considered to have been moved. The remaining units and Generals in the space are available for further operations on the Campaign Card.

20.4 Siege Status

A city is not considered Besieged until it is marked with one or more siege points, regardless of the number of siege attempts that have been made against it or the number of enemy CUs in the same space.

20.5 Restrictions on Besieged Forces

A besieged city may not receive reinforcements and a besieged General may not raise troops (8.2). A besieged Army or General may not leave the city via Naval Movement, nor may an Army or General debark directly into a besieged city (it may land outside the city walls). A besieged Army may sally forth and initiate battle against the besieging Army. If it does, the battle and battle card bonuses are resolved normally.

20.6 Lifting a Siege or Ending Subjugation

A siege is lifted or subjugation ended the instant there are no longer any enemy CUs in the space containing the Walled City or Tribe. If this happens, remove any accumulated siege or subjugation points (as appropriate). Reducing the besieging Army to below 3 CUs does not raise the siege or end subjugation.

20.7 Relief Armies and Besieged Forces

If you send an Army to attack an enemy Army that is besieging one of your Walled Cities, you may count the CUs inside the Walled City during the battle. When besieged CUs are added to an attack or a besieged Army attacks on its own, it is called a “sortie.” Battle losses can come from either the relief Army or the CUs that sortie, at the controlling player’s option. If there is a General inside the city when a sortie occurs, and that General outranks the commanding General of the relief Army, the General inside the city is considered in command for the battle. If no sortie occurs, the General inside the city is not used in the battle. Only the CUs and Generals that sortie may be retreated back into the walled city.

20.8 Completing a Siege or Subjugation

When you accumulate three siege points, flip the Walled City marker to your control and remove the siege points. If there were any enemy CUs inside the besieged Walled City, they are eliminated.

When you accumulate three siege points against a Tribe, remove the Tribe Marker and replace it with a friendly PC. Once a Tribe has been subjugated, it cannot reenter play. If your opponent regains control of the space, he may only place a friendly PC there.

20.9 Tribes Friendly to Carthage

The Carthaginian player begins the game with three Tribes friendly to him – the Boians, the Insubrians and the Brutiums. The Carthaginian player may consider these three Tribes as Friendly PCs in all respects (including Province control, a space to retreat to, and for isolating Roman PCs). These Tribe markers serve as a place where other Carthaginian PCs may trace to prevent isolation (19.4), and provide the Carthaginian player with an extra BC if a battle (with or without a Carthaginian General) occurs in the Tribe’s space.

21

ATTRITION

21.1 When Attrition Occurs

Attrition can occur for the following reasons:

WINTER ATTRITION: During the Winter Attrition Phase, all CUs (with or without Generals) in spaces containing an enemy PC or a non-friendly Tribe suffer Attrition. Players conducting sieges against a city should be aware that their CUs are in a space with an enemy PC and will suffer Winter Attrition if still there at the end of the turn.

MOUNTAIN PASS ATTRITION: Any time an Army crosses a Mountain Pass, that Army suffers Attrition. See Attrition Table for die roll modifiers.

EVENTS: When triggered by an Event Card (e.g., Hostile Tribe, Mercenaries Desert, Epidemic, Storm at Sea, and Pestilence).

21.2 Procedure

The owning player makes a die roll for each applicable occurrence and Consults the Attrition Table. The owning player cross-references the size of his force in the space with the die

roll to determine the number of CUs eliminated. Generals are never affected by attrition (even if attrition eliminates the last CU accompanying that General).

21.3 Hostile Tribes

If attacked by Hostile Tribes (Events #7 & #8) the size of your Army does not matter. Use the column on the attrition table marked Hostile Tribes.

22

VICTORY CHECK PHASE

22.1 Procedure

During the Victory Check Phase, players count the number of politically significant provinces they control. All are politically significant except Gallia Transalpinia, Massilia, Liguria, and the Balearic Islands. You earn one point for each politically significant province that you control. There are 18 possible Political Points.

22.2 Year End Political Repercussions

After calculating Political Points, the totals are compared. If one side has less points than the other, then the player in the minority must remove a number of his own non-walled, non-tribal PCs from the map equal to the difference in Political Points.

EXAMPLE: The Roman player has nine Political Points, and the Carthaginian player has seven, therefore the Carthaginian player must remove two of his PCs from anywhere on the map.

22.3 Sue for Peace

If a player does not have enough PCs to remove due to Political Repercussions, his country sues for peace and the game ends immediately.

22.4 End of Game

During the Victory Check Phase of the last turn, the player whose Political Point total is greater wins. If there is a tie, the Carthaginian player wins.

23

SUDDEN DEATH

Each player can win a Sudden Death Victory which ends the game immediately.

The Roman wins a Sudden Death Victory if he controls Carthage.

The Carthaginian wins a Sudden Death Victory if he controls Rome. He also wins a Sudden Death Victory if he controls all provinces in Italy except Latium during a Victory Check Phase.

Either player wins a Sudden Death Victory if his opponent sues for peace (15.6 and 22.3).

24

SPECIAL ABILITIES

RULE: Each General has a special ability, as indicated below his Holding Box. A General’s special ability can only be used when he is a commanding General. Most special abilities are self-explanatory but the following Generals require further clarifications:

HANNO: Hanno may not leave Africa, but he may sail from one African port to another. Hanno may only use his special ability to remove a Roman PC if his Army does not engage in battle. Hanno may conduct one or more overruns and still be able to use his special ability.

FABIUS: Fabius may not leave Italy, but may sail from one Italian port to another. If there is not at least one stack of 5 CUs in Italy, then Fabius is placed with any friendly CUs in Italy (doesn’t have to be the largest stack). If there are no CUs in Italy, Fabius is placed in Rome (even if under siege).

MARCELLUS: His ability does not apply to subjugation

SCIPIO AFRICANUS: His ability does not apply to subjugation

NERO: Nero can use his special ability with sea movement allowing his Army to move three spaces before or after sea movement (split in any fashion). Alternatively, Nero can move twice by sea in the same turn, using 3 MPs for each move.

GAIUS FLAMINIUS: His special ability does apply to preventing a withdrawal.

LONGUS: His special ability does not apply to preventing a withdrawal.

PAULUS: His special ability does not apply to preventing a withdrawal.

25

STRATEGY CARD LIST

This is a list of all the Strategy Cards, and explanatory notes on how some of them can or cannot be used.

- 1 **Corsica and Sardinia Revolt**
- 2 **Sicilia Revolts**
- 3 **Numidia Revolts**
- 4 **Celtiberia Revolts**
- 5 **Native Guide:** Only Generals with Strategy Ratings of 1 or 2 may use this event. This modifier is cumulative with other modifiers for the mountains. So a move across a non-Alps pass would have a “-5” net modifier. If the Army crosses two separate mountain passes, the modifier may be used for both.
- 6 **Marharbal’s Cavalry**
- 7 **Hostile Tribes:** This card may be played against CUs without a General. May be played versus a moving Army, stationary Army, or stationary CUs.
- 8 **Hostile Tribes:** This card may be played against CUs without a General. May be played versus a moving Army, stationary Army, or stationary CUs.
- 9 **Philip V. of Macedon:** When the “Philip V. of Macedon allies with Carthage” event is first played, place a marker on the Carthaginian Naval Modifier Box. The Carthaginian player receives this modifier until the event is played again by the Roman Player. When this happens, the Carthaginian player loses a Strategy Card, drawn randomly from his hand, and Philip is considered to have declared peace, the modifier is lost, and that event card is removed from

the Strategy Deck. Place a PC on the appropriate space on the Carthaginian Naval Combat Modifier chart on the map for the duration that this card is in effect.

- 10 **Macedonian Reinforcements**
- 11 **Balearic Slingers**
- 12 **African Reinforcements**
- 13 **Bruttium Recruits**
- 14 **Ligurian Recruits**
- 15 **Iberian Recruits**
- 16 **Gallic Recruits**
- 17 **Surprise Sortie**
- 18 **Traitor in Tarentum**
- 19 **Senate Dismisses Proconsul**
- 20 **Spy in Enemy Camp:** The revealed enemy BCs must be displayed face-up and remain open to view throughout the battle. If the Ally Deserts Event Card (Event #59) is played in combination with the “Spy in Enemy Camp” event, the player may select one of the visible BCs or randomly draw one of the unrevealed BCs at his option.
- 21 **Mercenaries Desert**
- 22 **Mutin’s Numidians**
- 23 **Numidian Ally**
- 24 **Sophonisba**
- 25 **Capua Sides with Carthage**
- 26 **Syracuse Allies with Carthage:** Place a PC on the appropriate space on the Carthaginian Naval Combat Modifier chart on the map for the duration that Carthage controls Syracuse.
- 27 **Hannibal “I have come...”**
- 28 **Hannibal Charms Italy:** Hannibal can remove the PC from the space he starts in, as long as he burns one of his movement points. This benefit may be used in spaces where Hannibal overruns Roman CUs or where the Roman Army avoids battle.
- 29 **Carthaginian Naval Victory:** Place a PC on the appropriate space on the Carthaginian Naval Combat Modifier chart on the map for the duration that this card is in effect.
- 30 **Carthaginian Siege Train:** The Siege Train has all the characteristics of a Carthaginian CU except it has no effect in a normal Battle. The Siege Train may not cross an Alpine Pass or use Sea Movement. If caught alone in a space by enemy CUs or forced to Retreat, it is removed from play. The Carthaginian player may play this event as many times as he likes, but he may only have one Siege Train on the map at a time. This unit does not take up space in the Army, so a Carthaginian Army can move with the siege train plus 10 CUs. If the event is played when the siege train is already in play, the siege train can be moved to a different Army.
- 31 **Spanish Allies Desert**
- 32 **Numidian Allies Desert:** If the player had control of both Numidian provinces, he would lose all four BC bonuses.
- 33 **Major Campaign Card**
- 34 **Major Campaign Card**
- 35 **Diplomacy**
- 36 **Diplomacy**
- 37 **Minor Campaign Card**
- 38 **Minor Campaign Card**

- 39 **Minor Campaign Card**
- 40 **Minor Campaign Card**
- 41 **Bad Weather:** If the Bad Weather card is played during a Naval Movement, the naval portion of the move is cancelled. The embarking force must return to its port and remain there for the balance of the round. This card can only be played against movement, not against Interception, retreats, Avoid Battle, etc. The card must be played before the player conducts any naval combat die rolls or mountain pass Attrition. If played against an Army crossing a mountain pass or strait, the target Army may not cross the mountain pass or strait if it needs to use its 3rd or 4th movement point to do so.

BAD WEATHER AND CAMPAIGN CARDS: If played during an opponent’s Campaign Card, it can be used to truncate the move of only one force and must be declared before another force moves as part of that Campaign. Also, the event affects the movement of the General and not the CUs (i.e., if the CUs are moved by two different Generals, they can still be moved a total of four spaces).

- 42 **Elephant Fright**
- 43 **Two Legions of Slaves Raised**
- 44 **Allied Auxiliaries (Apulia)***
- 45 **Allied Auxiliaries (Etruria)***
- 46 **Allied Auxiliaries (Samnium)***
- 47 **Allied Auxiliaries (Lucania)***
- 48 **Allied Auxiliaries (Campania) ***
* = These CUs have to be placed with a General in Italy and cannot be placed in Rome if there is no General there.
- 49 **Opposing Fleet Breaks Siege**
- 50 **Adriatic Pirates**
- 51 **Epidemic & Pestilence:** The player playing the card may choose which Army will roll for attrition.
- 52 **Epidemic & Pestilence:** The player playing the card may choose which Army will roll for attrition.
- 53 **Tribal Resistance**
- 54 **Treachery within City**
- 55 **Messenger Intercepted:** Variant: When you play this card as an event and get one of your opponent’s cards, your opponent has the option to have you play once again.
- 56 **Grain Shortage**
- 57 **Hanno Counsels Carthage***
- 58 **Cato Counsels Rome ***
* = The restriction on these cards are in effect until the start of the turn after the next reshuffling of the Strategy Deck (triggered by the Reshuffle card or when the Strategy Deck is exhausted). Players should place these cards near the map to remind them that they are in effect. These cards affect movement of CUs and not the placement of reinforcements. Generals without CUs may move in and out of Africa.
- 59 **Ally Deserts:** This card can be played before any BCs have been played (both players may observe which card is pulled), or held in the hand to be played in any round of the battle.
- 60 **Storms at Sea**
- 61 **Force March**
- 62 **Force March**
- 63 **Force March:** A player may use the Force March 3 card to make a naval move in addition to moving that force three spaces overland.

This card can be used to move a General by sea twice, each sea move costing the Army 3 movement spaces. That General could then pick up and drop off CUs along the way.

- 64 **Truce:** No Interceptions are allowed during a Truce. No siege attempts are allowed either, but players may keep their armies outside the city walls to retain their accumulated siege points. A Truce has no effect on subjugation of neutral Tribes. No matter how the truce is played, the deck is reshuffled at the end of the turn (the reshuffling does not break the Truce). Carthaginian Naval Movement is not affected by Roman Naval Supremacy during a Truce; however, Naval Movement can still be affected by Storms at Sea. If you have friendly units on enemy PCs when a Truce starts, your units may remain there. Enemy PCs underneath your units may not be converted and CUs on top of enemy PCs at the end of the turn still suffer attrition.

CARDS WHICH DO NOT BREAK THE TRUCE: Counter cards (storm at sea, bad weather, etc.) do not end a truce, nor is a truce broken when an event is played that does not occur (e.g. Allied Auxiliaries when there are not Generals in Italy to take the CUs). Events that move an Army also do not break the Truce.

CARDS WHICH BREAK THE TRUCE:

REINFORCEMENT CARDS: 5 Auxiliaries, 4 Recruits, African/Macedonian Reinforcements, Balearic Slingers, Mutin’s Numidians, Siege Train, Slaves.

REVOLT CARDS: Sicilia, Corsica/Sardinia, Celtiberia, Numidia, Syracuse, Numidian Ally, Sophonisba, Grain Shortage, and Capua Sides with Carthage.

ATTRITION CARDS: Both Hostile Tribe cards (if the event is used), Pestilence, Epidemic, Mercenaries Desert.

POLITICAL EVENTS: both Diplomacy cards, Philip V of Macedon, “I have come...”, both counsel cards (Cato/Hanno), and Senate Dismisses Proconsul.

SORTIES: Surprise Sortie, Tribal Resistance, Opposing Fleet Breaks Siege.

SPECIAL: Messenger Intercepted, Naval Victory

Reinforcement Cards and Besieged Walled Cities

All events that bring reinforcements on to the map (Allied Auxiliaries, etc) are under the same restriction as reinforcements in regards to besieged walled cities.

Distribution of Battle Card Deck

- 12 Frontal Assault
- 9 Flank Left
- 9 Flank Right
- 8 Probe
- 6 Double Envelopment
- 4 Reserve
