GAME RULES

- 1 Choose a challenge. Place the 5 cats and the 4 puzzle pieces with boxes on the game board as indicated. The orientation of the cats is not important, only their position on the game board matters.
- 2 Move the puzzle pieces with boxes - one by one - until all cats sit inside a cardboard box:
 - A) The position of the cats cannot be changed!
 - B) You can only move ONE box piece at a time. Before you move the next piece, the previous one must be placed back on the game board!
 - C) When you move a puzzle piece, you are allowed to rotate it and place it anywhere on the game board where it fits. The parts of a puzzle piece without a box cannot be placed on top of cats. Only the boxes will fit on top of cats.
 - D) Boxes that are placed on top of cats can be moved to a different position later if needed.
- 3 You have found a solution when each cat is inside a box. The shortest solution can be found at the end of the challenge booklet. The minimum number of moves is indicated next to the challenge, but feel free to use as many moves as you need!

To get you started the early challenges also indicate the order in which pieces need to be moved.
